## Twelve Capital reinforces ILS Analytics

Twelve Capital has engaged in an initiative to strengthen the firm's analytics capacities. In July 2014 Dr. Jan Kleinn joined Twelve Capital's ILS team as their Head of ILS Analytics. He will build up a team of analysts covering natural and man-made catastrophes. Twelve Capital is convinced that this is a core expertise and that analytics will remain one of the major alpha generators in the future.

Dr. Kleinn is a seasoned and respected expert in the field of natural hazard risk assessment and reinsurance. He was Head of Research & Development at Aspen Re from 2008 to 2014. His responsibilities included the evaluation, adjustment and in-house development of catastrophe models as well as event reporting. Prior to his assignment with Aspen Re he worked for PartnerRe's Research & Development developing reinsurance risk assessment models for European storms and tropical cyclones.

Jan Kleinn studied Environmental Sciences at the Swiss Federal Institute of Technology (ETH Zurich). He holds a PhD-degree in climate science from the Institute of Atmospheric and Climate Science at the ETH.

Dr. Urs Ramseier, Chairman, commented: "We are thrilled to welcome yet another experienced industry expert in our field of activity."

Please do not hesitate to contact us in case you might have any questions.

Kind regards,

Twelve Capital Team
